INTRODUCTION

OBJECTIVES

FE Magazine main objective is to keep all our readers updated with a month to month review of the latest information on today's commodity world.

Our other objective is to publish past and current commodity information to buyers, sellers, broker's and traders, also review the most important issue's in today's commodity Market.

COLUMNISTS

Our Columnists will bring you an up to date review on the world of commodities.

OUR MAIN GOAL

Our main goal is to help trader's and companies build a reliable business network around the world.

Our Customer Support Team is always at your disposal concerning any issues you may have, or about anything you have read.
fem@first-edge.co.uk

NOTICE BOARD

Notice Board is designed to place notices about any product you might be looking sell or buy. You can publish your company information also may wish to inform other buyers and sellers about your product or products.

If you have any question's or need further assistance, please do not hesitate to contact us.
fem@first-edge.co.uk

LEADING NEWS

Quick News points out what's happening in today's commodity market place and other area's.

FE Magazine Disclosures

By accessing all these pages, you have agreed that none of the information anywhere in our magazine or our website is designed as any form of marketing offer or advice of any type. It's just informational for illustrative purposes and you agree to consult with your legal, accounting or financial advisor if you require any advice or any kind.

Anne Huttenga
New Director of AU & Diamonds

Email: anne@first-edge.co.uk

There's not much anyone can say about Anne and her vast years of experience in AU and Diamonds, Anne has been with First Edge for many years, Mr McGhie and Mr Hebroke have welcomed her with open arms.

Mr H Hebroke
Company Director **New** Head of Asia Trading Accounts
Head of International Banking

Mr Hebroke is a life long friend of Mr McGhie he was also one of the main architect of First Edge. Mr Hebroke owns his own Family Trading Commodity Company which has been trading for over 80 years.

Soji Doherty
New Head Of All Legal's

Email: sd@first-edge.co.uk

Everyone at First Edge has welcomed Mr Doherty new Position in overseeing all Legal Transaction That is passed onto First Edges desk.

Mr Doherty former owner of a prominent Law Firms (Vincent Doherty) based in City of London until 2010 when he decided to look at other new businesses where he could expand his talent on other fields around the world.

Miss Alanna Steinberg alanna@first-edge.co.uk

New Main Monetary Front End Support Position and Back Room Support also Main Intermediary and Negotiator

Mr Daniel Rice **New** Position Email: dr@first-edge.co.uk
Front end and Back Room Support Also Main Intermediary Broker for 3 years and has negotiated main deals with buyers & sellers in Gold & Diamonds he is now positioned to hold his own book and negotiate other main commodities products to extend his knowledge in the industry.

Is China (stealth) Buying Gold?

After the long Feb Chinese New Year Holiday, Chinese buyers returned to the low-ered priced gold market. Gold prices jumped as high as \$1618 per ounce in the early session. While the Group of 20 announced that they pledged not to target exchange rate for competitive purposes, Japanese Yen extended its losses against US dollar. US market closed today for Presidents' Day. In our view, market sentiment in gold is weak amid high yielding equities. Short term gold buyers should focus in the techni-cal's which were dominant in the market these days.

Gold \$1609.6 ▼ \$0.5

RESEARCH

China holds a tiny proportion of its official foreign exchange reserves in gold (just 1.6%) and has indicated a desire (see wikileaks as well as comments from PBoC and China Gold Investment Research Institute) to add to its modest stock of 1,054 tonnes of the yellow metal. China is the world's sixth largest holder of gold reserves. Most emerging nations including India and Russia currently hold over 7% of their reserves in gold - and these are growing.

China has a track record of accumulating gold by stealth. In 2003 it officially re-ported reserves of only 600 tonnes of the yellow metal but surprised the market in 2008 by announcing it had quietly nearly doubled its holdings to 1,054 tonnes. It is not clear where China had acquired that gold, but it was rumoured to have been a good buyer of UK Treasury gold at the Bank of Eng-land auctions between July 1999 and March 2002, during which time the then Chan-cellor Gordon Brown had disposed of nearly 400 tonnes of UK gold.

Nigerian National Petroleum Corporation (NNPC)

Is China (stealth) Buying Gold?

China currently holds just over \$3 trillion in foreign exchange reserves (that's \$3,000 bn) ; if it wanted to convert 5% of those reserves into gold at the current spot price (I would like to see them try) and bring them into line with their peers then they would need to purchase \$150 bn of gold which is approximately 2,460 tonnes.

In short, they would need to buy every ounce of gold mined in the next 12 months. Put another way - China would need to acquire as much metal as all of the Gold ETFs out there (currently accounting for 2,276 tonnes of metal off market) to achieve its aims. If we accept that China does want to diversify away from dollars into gold then the question that sensibly needs to be asked is at what price their order would be filled at. Well of course it is impossible to say but if one considers the pivotal role the ETF had in shaking gold out from a 21 year low at \$254/oz (the price of the first Bank of England gold auction) to today's all time high of \$1920 then the impact would be at least as big, if not bigger (bearing in mind that gold is already supply-challenged).

Anecdotaly we see that gold is repeatedly well supported on any dip and it is clear there is a large buyer in the market. It is difficult to ascribe a name and location to that buyer but we would not be surprised to hear that the Chinese have indeed been good buyers of gold by stealth once again.

It is clear there is excellent gold demand in China from retail investors and it is difficult to separate the 'official' buying from the institutional or indeed retail buying. Consumers in China are panic buying as a hedge against inflation and other economic concerns. As a result, China's share of global demand for gold has increased from just 6% in 2000 to 18% in 2010.

Still, if the Chinese wanted to buy some gold, there is a chap currently crossing the Libya/Niger border - who - if he has all his countries reserves with him as believed, may have 144 tonnes to sell them.

What fuel Companies, Banks and, Countries is F1 main sponsor

Certain U.S. investment groups have found that the smart money is in F1, the sport has a major presence of Fuel Companies and Banks that has replaced the cigarette companies as F1 Sponsors.

At the beginning of this year three major U.S. investment groups have bought a 21 percent stake in Formula One from private equity firm CVC Capital CVC.UL for \$1.6 billion ahead of the motor racing company's planned flotation (smart move).

At the beginning of the year 2013 three Major U.S. investment groups, Waddell & Reed (WDR.N) and BlackRock (BLK.N), along with Norway's Norges Bank Investment Management, the asset management unit of the Norwegian central bank.

Waddell & Reed invested \$1.1 billion through its Asset Strategy mutual funds and separate accounts. Norges Bank is believed to have contributed around \$300 million and BlackRock the remaining \$200 million in deals struck since the start of this year 2013.

As fans flocked to the 2012 American Circuit in Austin, Texas, for the Formula One United States Grand Prix, the best indication of how important the U.S. is to F1 comes by looking at how many of the sponsors in the series have their headquarters in the United States. For the past five years, more of the brands involved with F1 have been based in the U.S. than in any other country.

Last year 31 sponsors came from F1's traditional heartland of the United Kingdom whereas 34 were based in the U.S. They include hotel operator Hilton, semi-conductor manufacturer AMD and oil giant ExxonMobil—companies that, between them alone, are paying a combined total of around \$31 million in 2012, according to F1's industry monitor, *One U.S. investor stated*, they sure aren't getting involved with F1 for the promotion to a home crowd.

U.S.-based multinational corporations are attracted to F1 because it gives them exposure to 515 million television viewers worldwide, as well as visibility to 3.4 million spectators at races in countries as far flung as Abu Dhabi and Singapore. Luckily for F1, these companies' prime concern is not increasing awareness in the U.S. For the past five years there has been no U.S. round on F1's calendar after the collapse of talks to extend the previous race at the Indianapolis Motor Speedway. As is often the case in F1, that decision came down to money since the sport's commercial supremo, Bernie Ecclestone, wanted to increase the annual fee for the U.S. Grand Prix which stood at an estimated—and relatively paltry—\$10 million.

Nigerian National Petroleum Corporation (NNPC)

What fuel Companies, Banks and, Countries is F1 main sponsor

F1 is run by a company called Delta Topco which is based in the British tax haven of Jersey. Its biggest shareholder is European private equity firm CVC, which holds a 35.5 percent stake in the business.

Ecclestone has a 5.3 percent stake in Delta Topco, with 8.5 percent owned by his family trust and the remainder in the hands of banks, funds and other management. It is a high-octane investment.

The revenue from ticket sales usually barely covers the annual hosting fee—and then there are the administrative and logistical costs to hold the race, which cost almost another \$20 million. It would leave a significant shortfall in the budgets of F1 races if it wasn't for investment from governments.

In emerging markets such as India and South Korea, governments gladly cover the difference because the race acts as a promotional tool which puts them on the global sporting map alongside wealthy developed nations like England and Monaco. Hosting a Grand Prix also drives tourism by promoting the country to a massive number of TV viewers. This has made the slots on the F1 calendar highly sought after by Asian and emerging nations. The bidding war between them has driven up the average annual hosting fee by \$15.7 million since 2003.

In turn this has priced many countries out of the market for a race, particularly in Europe where tourism is already strong enough so F1 is not needed to boost it. In many of these countries, governments have refused to bankroll the hosting fees and so races have been lost in Austria, France and Turkey also curtain African and Caribbean Islands.

The U.S. isn't known for being in desperate need of a boost in tourism and even if it was, it seems unlikely that F1 would do the job. The U.S. Grand Prix at Indianapolis was not famous for racing incidents but for scandal which angered fans.

Just three teams took part in the 2005 race as problems with the Michelin tires forced the seven others to sit it out. Fans threw bottles onto the track and later launched an unsuccessful class-action suit. It did nothing to boost the reputation of Indianapolis worldwide and the race was already hardly a magnet for international tourism; ticket sales records show that in 2004 just 5.3 percent of the 98,936 spectators came from outside the U.S.

The U.S. isn't known for being in desperate need of a boost in tourism and even if it was, it seems unlikely that F1 would do the job. The U.S. Grand Prix at Indianapolis was not famous for racing incidents but for scandal which angered fans. Just three teams took part in the 2005 race as problems with the Michelin tires forced the seven others to sit it out. Fans threw bottles onto the track and later launched an unsuccessful class-action suit. It did nothing to boost the reputation of Indianapolis world-wide and the race was already hardly a magnet for international tourism; ticket sales records show that in 2004 just 5.3 percent of the 98,936 spectators came from outside the U.S.

So if the U.S. isn't in dire need of an increase in tourism, and if F1 isn't an ideal way to do it, anyway, then why is the state of Texas prepared to bankroll the race? It is down to an extremely smart deal arranged by Tavo Hellmund, the Texan entrepreneur who in May 2010 signed the original contract with Ecclestone to bring the sport to Austin.

The first full Formula One Grand Prix was held in Texas in 2012, the funding for the entire sanction for 2012 was paid to Formula One World Championship Limited (FOWC).

.An independent study produced earlier this year projected that, all being well, the ceiling for the economic impact of the U.S. Grand Prix will be \$293.9 million annually, with \$26.4 million in tax dollars generated for the state. It forecast that there will be 120,000 spectators and, according to the race organizers, an estimated 80 percent of them will come from outside Texas.

Attaining this number of out-of-state spectators would be a significant improvement over the performance at Indianapolis, where a study of the 2004 race showed that 63.8 percent of attendees were from out of the state.

Less expected sources of revenue are helicopter take-off and landing slots which can bring in as much as \$1.5 million. It is due to the huge number of wealthy personalities involved with and interested in F1. Indeed, the world record for the busiest airport on one day is Silverstone's heliport during the 1999 British Grand Prix when there were 4,200 aircraft movements. It now averages at around 1,500 per race with each slot charged at approximately \$1,000, well done Texas.

What fuel Companies, Banks and, Countries is F1 main sponsor

Ferrari and their partner Shell

Shell is the only company to have a track-side laboratory at every race to test fuel and oil samples. It occupies a quarter of the six-million-dollar Ferrari mobile engineering lab.

UBS Chinese Grand Prix

This race is sponsored by Swiss bank and financial firm UBS.

Gulf Air Bahrain Grand Prix

The Bahrain race is sponsored by Middle Eastern airline Gulf Air.

Santander Spanish Grand Prix, Santander British Grand Prix, Santander German Grand Prix,

Santander Grand Prix of Italy

These races are all sponsored by Spanish financial services and European banking giant **Santander**.

Monaco Grand Prix, Canadian Grand Prix, Grand Prix of Europe, Hungarian Grand Prix, Japanese Grand Prix, Korean Grand Prix, United States Grand Prix, Grand Prix of Brasil

These races currently have no title sponsors.

Shell Belgian Grand Prix

This event is sponsored by the oil company Shell.

Singtel Singapore Grand Prix

This race is sponsored by telecommunications company Singtel.

Airtel Indian Grand Prix

The Indian GP is sponsored by Indian wireless provider Airtel.

Etihad Airways Abu Dhabi Grand Prix

This race in the Middle East is sponsored by Etihad Airways, the national airline of the United Arab Emirates.

As of the 2014 season, all F1 cars will be equipped with turbocharged 1.6-litre V6 engines. Turbochargers have been banned since 1988. This change may give an improvement of up to 35% fuel efficiency.

The fuel used in F1 cars is fairly similar to ordinary petrol, albeit with a far more tightly controlled mix. Formula One fuel can only contain compounds that are found in commercial gasoline, in contrast to alcohol-based fuels used in American open-wheel racing. Blends are tuned for maximum performance in given weather conditions or different circuits. During the period when teams were limited to a specific volume of fuel during a race, exotic high-density fuel blends were used which were actually heavier than water, since the energy content of a fuel depends on its mass density.

To make sure that the teams and fuel suppliers are not violating the fuel regulations, the FIA requires Elf, Shell, Mobil, Petronas and the other fuel teams to submit a sample of the fuel they are providing for a race. At any time, FIA inspectors can request a sample from the fueling rig to compare the "fingerprint" of what is in the car during the race with what was submitted. The teams usually abide by this rule, but in 1997, Mika Häkkinen was stripped of his third place finish at Spa-Francorchamps in Belgium after the FIA determined that his fuel was not the correct formula, as well as in 1976, both McLaren and Penske cars were forced to the rear of the Italian Grand Prix after octane number of the mixture was found to be too high.

[Continue on page 11](#)

What fuel Companies, Banks and, Countries is F1 main sponsor

Surprising but true, despite the vast amounts of technical effort spent developing a Formula One car, the fuel it runs on is surprisingly close to the composition of ordinary, commercially available petrol.

It was not always so. Early Grand Prix cars ran on a fierce mixture of powerful chemicals and additives, often featuring large quantities of benzene, alcohol and aviation fuel. Indeed some early fuels were so potent that the car's engine had to be disassembled and washed in ordinary petrol at the end of the race to prevent the mixture from corroding it!

Over the years more and more regulations have been introduced regarding the composition of fuel, a move driven in part by the oil companies' desire to have demonstrable links between race and road fuel.

The modern fuel is only allowed tiny quantities of 'non hydrocarbon' compounds, effectively banning the most volatile power-boosting additives.

Each fuel blend must be submitted to the sport's governing body, the FIA, for prior approval of its composition and physical properties. A 'fingerprint' of the approved fuel is then taken, which will be compared to the actual fuel being used at the event by the FIA's mobile testing laboratory.

During a typical season a Formula One team will use over 200,000 litres of fuel for testing and racing, and these can be of anything up to 50 slightly different blends, tuned for the demands of different circuits - or even different weather conditions. More potent fuels will give noticeably more power but may result in increased consumption or engine wear.

All of Formula One's fuel suppliers engage in extensive testing programmes to optimize the fuel's performance, in the same way any other component in the car will be tuned to give maximum benefit. This will likely involve computer modeling, static engine running and moving tests.

The car's engine oil is also worth a mention. It helps to perform a vital diagnostic role, being closely analyzed after each race or test for traces of metals to help monitor the engine's wear rate.

BP appeal over 'absurd' Gulf oil spill payouts

The compensation settlement - like the disaster - is one of the biggest in US history

Oil giant BP is taking legal action in the US to limit payouts by a fund set up to compensate those affected by the 2010 oil spill in the Gulf of Mexico. BP said some of the claims being paid by the scheme's administrator were "fictitious" and "absurd", BP set aside \$7.8bn (£5.2bn) when it agreed to pay compensation in 2012, but it now expects a much higher total.

The Deepwater Horizon disaster released an estimated four million barrels of oil into the Gulf, An explosion on an offshore rig killed 11 workers and ruptured a deep-sea well head, which took 84 days to seal. Last year BP agreed to pay compensation to around 100,000 people and companies - including fishermen and restaurant owners - who claimed the oil spill had harmed their livelihoods or their health, But it says the lawyer administering the compensation fund is misinterpreting the terms of the agreement and making pay-outs that are too generous.

'Underestimate'

BP highlights companies far from the coast that were given payments despite earning higher profits in the year of the spill than in previous years. The examples given include \$21m to a Louisiana rice mill 40 miles inland and \$9.7m to an Alabama construction company nearly 200 miles (320km) from the sea.

"BP did not agree to pay what is already hundreds of millions of dollars, and potentially billions, to claimants with 'losses' that do not exist in reality," the company said in papers filed at the court in New Orleans. In response, lawyers representing the claimants said BP had "undervalued the settlement and underestimated the number of people and businesses that qualify under the objective formulas that BP agreed to".

BP is appealing against a ruling earlier this month that upheld the way compensation is being paid. It says it could be "irreparably harmed" by the payouts, The same judge is also presiding over a separate trial of BP and other companies on civil charges over the oil spill, which was one of the worst in US history.

If it loses that case it could face a further huge fine, despite having already agreed in 2012 to pay \$4.5bn to settle criminal charges.

bp

BP: Scope of oil disaster internal probe 'had limitations

The probe found that crew members missed an early warning that the rig was about to blow

A BP executive has admitted that an internal probe he led into the Gulf of Mexico oil disaster "had limitations". Mark Bly told a New Orleans court that the investigation did not consider the role of budgetary pressures from senior management in causing the accident.

A BP policy that investigations look at systematic failures by management was waived when the probe was initiated three days after the 2010 spill. The trial will decide how much of the cost of the disaster BP must bear. The civil lawsuit was brought against the UK oil firm - as well as other companies involved in the accident, including rig-owner Transocean and cement-provider Halliburton - by the US Justice of Department and the US states affected by the oil slick.

The plaintiffs claim that BP put profits before safety, and the oil leak happened because drilling was rushed due to pressure from management to cut costs. A lawyer for the plaintiffs, Paul Sterbcow, noted in court that the Macondo project had already overrun by \$60m and was a month behind schedule, with each additional day adding another \$1m to costs. "I don't recall it being part of our discussions," Mr Bly said, when asked about the cost overruns.

Missed early warning

The BP executive, who headed the company's safety and operational risk department, said that he and then-chief executive Tony Hayward decided to exclude a broader "systematic evaluation" from the scope of the investigation. "We're tasked with getting the answer as quickly as we could, and trying to get to a position where we felt we could make good recommendations," he said. "Having done that, we did have the option to try to go further, but at that point in time, given the limitation that we've touched on, it would have been very, very difficult to do that."

Mr Bly, who has since been promoted to BP's executive committee, said he planned to retire in the next two months. The investigation did discover that BP's rig supervisors and crew members from Transocean had not carried out a crucial safety test properly, missing an important early warning that the pressure was too high and the well was about to rupture.

Chevron and Chubu Electric sign Wheatstone LNG agreements

Chevron Corporation (NYSE: CVX) today announced that its Australian subsidiaries have signed binding long-term Sales and Purchase Agreements (SPAs) with Chubu Electric Power Company Inc. (Chubu) for liquefied natural gas (LNG) from the Wheatstone Project in Western Australia.

“More than 80 percent of Chevron's equity LNG from Wheatstone is covered under long-term off-take agreements with customers in Asia. The agreements demonstrate that Wheatstone is well-placed geographically to meet the Asia Pacific region's growing demand for a safe, reliable and cleaner-burning source of energy.”

Under the agreements Chevron, together with Apache Energy and Kuwait Foreign Petroleum Exploration Company, will supply Chubu with 1 million tons per annum (MTPA) of LNG for up to 20 years.

Joe Geagea, president, Chevron Gas and Midstream, said, “Chubu, one of the world's leading LNG customers, is now a partner and customer of the Chevron-operated Gorgon Project. We are pleased to expand the strong partnership between our two companies with these SPAs for Wheatstone LNG.”

Roy Krzywosinski, managing director, Chevron Australia, said, “More than 80 percent of Chevron's equity LNG from Wheatstone is covered under long-term off-take agreements with customers in Asia. The agreements demonstrate that Wheatstone is well-placed geographically to meet the Asia Pacific region's growing demand for a safe, reliable and cleaner-burning source of energy.”

The Chevron-operated Wheatstone Project is located at Ashburton North, 7.5 miles (12 kilometres) west of Onslow in Western Australia. The project will consist of two LNG trains with a combined capacity of 8.9 million tons per annum and a domestic gas plant.

The Wheatstone Project is a joint venture between Australian subsidiaries of Chevron (64.14%), Apache Energy (13%), Kuwait Foreign Petroleum Exploration Company (7%), Shell (6.4%), and Kyushu Electric Power Company (1.46%), together with PE Wheatstone Pty Ltd. (part owned by Tokyo Electric Power Company, 8%).

Total launches Moho Nord development in the Republic of the Congo

Total, operator of the Moho-Bilondo license, today announces the final investment decision and EPC contract awards for the Moho Nord development, consisting of the Moho-Bilondo Phase 1bis and Moho Nord projects. First oil is expected in 2015, with output reaching 140,000 barrels of oil equivalent per day (boe/d) in 2017. The joint development represents an investment of US\$10 billion.

Located approximately 75 kilometers from Pointe-Noire and 25 kilometers west of N'Kossa in water depths ranging from 450 to 1,200 meters, the Moho Nord project will target additional reserves in the southern part of the license (Phase 1bis) and new reserves in the northern part (Moho Nord). The additional reserves are estimated at approximately 485 million barrels of oil equivalent.

"The development of Moho Nord marks another milestone in Total's long established presence in the Republic of the Congo and leverages our demonstrated expertise in successfully managing major projects, especially in the deep offshore. The launch enhances visibility on Total's production growth objective," commented Yves-Louis Darricarrère, President of Total Upstream.

The project is the latest step in developing the license, following on from Moho Bilondo Phase 1E, brought on stream in 2008.

For Phase 1bis, a total of 11 subsea wells in the Miocene will be tied back to the existing FPU on Moho-Bilondo, whose processing capacity will be increased by 40,000 boe/d. For Moho Nord, 17 subsea wells targeting Miocene reservoirs will be drilled and tied back to a new floating production unit (FPU) and 17 more subsea wells targeting Albian reservoirs will be developed from a new build tension leg platform. Before being exported by pipeline to the onshore Djeno Terminal, the new production will be processed on the FPU, which will have a capacity of 100,000 boe/d.

The installations have been designed to limit environmental impact. Measures include eliminating flaring under normal operating conditions and reinjecting all produced water.

As part of the project, Total will promote local content by encouraging development of the regional industrial base.

Total E&P Congo, the Group's wholly owned subsidiary, operates the Moho Bilondo license with a 53.5% interest, alongside state-owned Société Nationale des Pétroles du Congo (15%) and Chevron Overseas Congo (31.5%).

Total Exploration & Production in the Republic of the Congo

Present in the Republic of the Congo since 1968, Total is the country's leading oil producer. Total E&P Congo operates 10 of the 22 fields developed, accounting for nearly 60% of national output. The Group's net equity production averaged 113,000 boe/p in 2012.

In the Republic of the Congo, as in all countries where it operates, Total fully recognizes its responsibilities to local communities and in the area of environmental protection. The Group is supporting long-term projects in the country focused on education, public health, local economic development and the environment.

The All New FE Gold & Diamond News

ATNA cuts 120 feet grading 0.057 oz/ton gold at reward gold project

Atna Resources Ltd. ("Atna" or the "Company") (TSX:ATN/OTCQB:ATNAF) is pleased to provide results from the remaining drill holes in the recently completed Reward gold project drilling program near Beatty, NV.

The drilling program is designed to expand the existing resource and reserves at Reward. Fourteen holes were completed in the program for a total footage of 9,013 feet (2,747 m). Assays have been received on all holes with continued promising results in the new zone announced last month (February 25th, 2013 press release).

Gold mineralization at Reward is controlled principally by the Good Hope fault zone; a sheeted, steeply dipping, north-south-trending quartz-vein zone.

Adjacent to the Good Hope fault, the phyllitic quartzite, siltstone, and shales dip moderately to the east (45 degrees) and are host to more disseminated gold mineralization associated with narrow iron oxide veinlets (after pyrite) and minor quartz veining. The Reward gold deposit has been sampled by more than 350 holes totaling more than 130,000 feet drilled by a number of mining entities over the past 15 years including the Company.

Gold mineralization has been encountered over a strike length of more than 2,400 feet and to a depth of 750 feet along the Good Hope structure. The width of mineralization within the structural zone ranges from a few feet to up to 200 feet and the bedded zones along the southeastern flank of the main Reward deposit attains thicknesses in excess of 300 feet. The Reward gold project has received both US and State permits that will allow construction of the mine.

Analytical results contained within this press release were completed by standard fire assay methods with an atomic absorption finish by American Assay Laboratories, an independent, IAS accredited Testing Laboratory (ISO/IEC Standard 17025:2005) serving the mining industry of northern Nevada located in Sparks, Nevada. American Assay maintains rigorous QA/QC procedures in its laboratory and its assurance program is bolstered by Atna's internal QA/QC protocol to insure reliable and reproducible analytical results.

This press release was prepared under the supervision and review of William Stanley, V.P. Exploration of Atna, a Registered Member of the Society for Mining.

239 Carat Diamond Recovered in Botswana

This 239 ct. diamond was recently discovered in Botswana. Photo courtesy Lucara

A 239.2 ct. rough diamond has been recovered from the Karowe mine in Botswana.

William Lamb, president and CEO of mine owner Lucara Diamond, tells *JCK*: "The color is good, but because of the surface texture, it is difficult to say on the clarity."

The company also recovered two more large stones in the concession, one weighing 124 cts. and the other weighing 71.1 cts. All the diamonds will be sent to Antwerp and sold later this year.

The same Botswana concession made headlines last year when Lucara unearthed a 9 ct. blue stone. It was later sold for \$4.5 million.

9 Carat Blue Diamond Discovered in Botswana

Lucara Diamond Corp. has recovered an ultra-rare 9.46 ct. Type II blue diamond at its Karowe mine in Botswana.

The diamond will be sold at the mine's upcoming tender on Nov. 26.

William Lamb, Lucara's president and CEO, tells *JCK* the company believes the stone will polish out to a fancy blue, with VVS1 or better clarity.

FIRST  EDGE MEDICAL

Hospitals – Medical Supplies & Equipment

We understand the unique challenges that medical supply procurement and purchasing professionals are faced with at our local, state and regional hospitals. The face of healthcare is evolving every year with tighter regulations, increased scrutiny from outside agencies, and intense attention to controlling costs and bottom lines. Hospital medical supplies and hospital medical equipment fall directly into this moving target zone. Our goal in working with our hospital clients is to really understand how they purchase their medical supplies and how best our **First Edge Medical** offering can complement their internal and external buying requirements.

So what does First Edge Medical bring to the table for our hospital clients?

Several benefits that can make a difference.

Flexibility. Because of our company size, we are flexible with everything needed to build a reliable and professional relationship with you and your hospital.

Quick Response. Again, our company size allows for fast decisions and turnaround. Whether the decisions are on emergency shipments, on-hand inventory supply management, depth of choices in manufacturers, or extended credit terms, rely on us for a quick and professional response.

Relationships. At any time, you can pick up the phone and reach one of our main team. We work everyday in our business and we are totally accessible to our clients, 24/7.

Diversity Oriented. We work with our clients to develop their economic procurement plans and assist them in meeting their diversity business goals, as these goals and objectives are a very real and important part of our client's business plans. **First Edge Medical** believes in and supports that supplier diversity is not a "set-aside or a quota", but a good business-growth strategy with our clients.

PRIVATE PLACEMENT INVESTMENT PROGRAMS

NO RISK

INVESTMENT AND HUMANITARIAN PROJECT FUNDING PROGRAMS

The following new Private Placement Investment Programs, are designed and structured to assist Investors to raise Capital to Fund Humanitarian Projects. More important, they are also designed to eliminate the concerns and perceived risk, that some Investors may harbor with respect to raising Capital successfully !

For these reasons, if requested, we will assist the Investors with their up-front Banking cost, the MT 760 cost and in addition, we will deliver to the Investor's Bank, a SBLC for the full value of the invested Funds, as a Security Guarantee.

The SBLC will stay in the Investors Bank account until the end of the term of the Private Placement Program.

The cost of the Banking charges, the MT760 etc... will be repaid from the proceeds / profits, of the Private Placement Program.

For the sake of brevity and clarity, we will provide only salient and key information of the programs. Additional information can be provided upon request.

PROGRAM A

Cash Investment : 20 Million USD to 100 Million USD, SBLC Upfront Security Guarantee, delivered to the client.

Instrument Invest : Same Dollar Value, MT 760, Paid upfront by the Trading Group.

Term : 1Yr. 3Yrs. 5Yrs. Income Stream.
Return : 25% per Month or 300% per Year.

PROGRAM B

Cash Investment : 100 Million USD to 500 Million USD, SBLC Upfront Security Guarantee, delivered to the client.

Instrument Invest : Same Dollar Value, MT 760, Paid upfront by the Trading Group.

Term : 1Yr. 3Yrs. 5Yrs. Income Stream.
Return : 37% per Month or 445% per Year.

SEE OUR WEBSITE :
www.femagazine.co.uk

www.femagazine.co.uk

PRIVATE PLACEMENT INVESTMENT PROGRAMS

NO RISK

INVESTMENT AND HUMANITARIAN PROJECT FUNDING PROGRAMS

PROGRAM C

Cash Investment : 500 Million USD to 1 Billion USD, SBLC Upfront Security Guarantee, delivered to the client.

Instrument Invest : Same Dollar Value, MT 760, Paid upfront by the Trading Group.

Term : 1 Yr. 3Yrs. 5Yrs. Income Stream. Return : 50% per Month or 600% per Year.

PROGRAM D In-ground Asset extraction and Funding.

This program is designed to assist Investors develop their mineral asset deposits and operations. ie; Oil, Gold, Ore etc..

It is intended to provide unrestricted access to non-recourse funding, create jobs and contribute to a viable and growing economy.

The value of the mineral asset deposits will be measured and based on the Geological Engineering Reports confirming the assets on deposit. Once the assets on deposit are confirmed and a value is established, the assets will be insured and monetized. The established and monetized value will then be placed in one of our programs as expressed above.

It should be noted that the above special programs are designed for specific project funding and specific Investor requirements.

For experience Investors, we still offer our regular programs with much higher profits.

Please feel free to contact me if you require more information.

19 SPICE OFFER

First Edge Commodities is pleased be associated in Marketing 19 SPICED

We have done our own research and sampling of this New Rum Drink at 3 of London's Top Restaurants And Bars based in the City and have got better than expected review .

We was also informed in the middle of April that the 19 SPICE received a Spirit Business Award

The Spirits Business Awards was won in the spiced rum category.

First Edge is a direct agent of this product.

We can advise of the following. We are selling **under a major known Scottish Company** so it will be up to the purchaser to satisfy any and all customs requirements for their destination.

Please be aware this is a first come first serve area around the world and only for people who has an indebt knowledge in the liquor industry.

Once they have reviewed our price they will automatically know what deal there getting.

If you are interested in this New product please email: dm@first-edge.co.uk

You will be sent 19 Spiced Break Down Cost once you have shown First edge that your company or the main contact on who you think would be prepared to look at this product has the capability to purchase.

Please also note we can supply 1lt, 50cl and 35cl bottles also and should be able to supply mixed cases if required. This must be discussed and agreed beforehand however as the quantity must justify the extra handling etc. The **70cl bottle** is the most popular and so that is why I am quoting you for that. If there is a specific market that requires other sizes we will of course try to satisfy the customers request.

A stronger alcohol content may also be available subject to demand at 37% and 40% respectively.

This is no different to any other business than it is all about volume! There may be some manoeuvrability on the price but that will be strictly down to the volume ordered. Having said that we do of course want to work with people who knows about product's like this.

Scams Review for July and August 2012

Welcome to another 2 month dedicated to Evil Fraudsters and Scammers and how far these people would go to get their hands on your money.

We at First Edge have seen & knows all what there is to know about scammers.

We will can also supply you with the right procedures and put you in contact with the right sellers that can make you money.

90% of the time it come down to greed in losing your investment this means not looking at the downside of the transaction and not speaking with professional companies like First Edge for advice.

First Edge can safely say it has never lost out on any Gold Deal that why we are getting more and more investors to transact deals for them.

Our procedures are water tight and we are always updating our procedures for our ourselves & our wide range of financiers.

The scams can range from a business claiming to be a gold bar, gold dust or gold coin supplier to an individual involved in the shipping, investment or sale of gold. Gold scams are common in West Africa but no country is immune. Scams can take place in any country.

In addition to the common gold scams on the internet, gold bars carry an increased risk of forgery due to their less stringent parameters for appearance. Larger bars have a greater volume that can enable a partial forgery using a tungsten-filled cavity, which is not easy to detect. Fake gold coins are common, and are usually made of gold-plated lead. The purity of a gold bar or coin can be expressed as a decimal figure ranging from 0 to 1, known as the millesimal fineness. Such ratings and quality inspections can be easily manipulated.

How to Contact INTERPOL through FE Magazine

If you have been scammed or have tried to be scammed and have the full details on he person or people, please sent the information to FE magazine so our team can start to investigate the person or the people involved. (info@femagazine.co.uk)

There is two ways to contact INTERPOL

1. The quickest way is to go direct to their website (in contact us). here Is the direct link:
<http://www.interpol.int/Contact-INTERPOL>

internetpol_police_force_unit@qtar.io

internetpol_police_force_unit@qtar.io; interpolice77@ymail.com; interpolicee-unit@tk.tc

2. you can also go through FE Magazine who will fax to INTERPOL with a FE Magazine reference number, We will cc you a copy for your files we will also email Interpol a copy also.

WANTED PATRIZIO PILATI

First Edge has a full book on him for:
Fraud, using other companies to obtain credit.
(this man is a very good liar be very careful)

Subject: Patrizio Pilati
To: asrtech1981@gmail.com

He is now operating under a company from Dubai, and Australia with A Partner by name Of Alan the Company goes by the call letter NTR Nexus Technologies & Resources

Good Day Sir,

I have just come across your website and I wish I had known about it 3 weeks ago. The snake that that man is, is unbelievable.

He has cost me just over \$12 000 in flights, accommodation, food and sorts.

He said that we needed to take Industrial diamonds to Zanzibar for him and that he will pay immediately. we were then told the transfer had been done, yet we are still waiting for that.

Something needs to be done to stop this man. Kaylan Grover Cell : 073 486 4621 Skype : kaylan.grover

Churches hold prayers for ailing Nelson Mandela

Excess fluid has been drained from Mr Mandela's lungs to ease breathing

Churches across South Africa are to hold prayers for Nelson Mandela, who has been in hospital for four days being treated for pneumonia.

Several hundred people are expected to gather at the Regina Mundi church in Soweto - once a focal point of the struggle against apartheid.

On Saturday, South Africa's presidency said Mr Mandela, 94, was breathing without difficulty. It said excess fluid had been drained from the lungs to ease his breathing. There are no details yet on how long he will remain in hospital.

After Mr Mandela was admitted to hospital late on Wednesday, President Jacob Zuma said people "must not panic"

Cyprus straining to reopen banks

The head of the Cypriot central bank says "superhuman" efforts are being made to open the country's banks on Thursday, after being shut for more than a week.

G.I. Joe: Retaliation

Actor Bruce Willis is joined by Emma Heming, Rumer Willis and Jayson Blair for the premier of his new film G.I. Joe: Retaliation, in Hollywood. The science fiction action film, based on Hasbro's G.I. Joe toy, comic and media franchises also stars Dwayne Johnson and Channing Tatum.
